To whom it may concern:

SUBJECT: Reference for Aguilar y Salas, s.a.

Aguilar y Salas, s.a. (A&S) has been a supplier of pressure vessels and heat exchangers to UOP/Honeywell for over ten years. During that time they have fabricated many different types of vessels and heat exchangers for us using varying materials of construction. These materials include carbon steel, stainless steel, and chrome alloys.

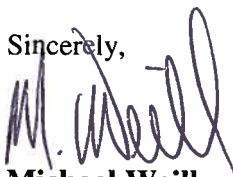

The work that A&S has performed for UOP/Honeywell has been in full compliance with UOP project specifications in addition to international EPC and end user refinery requirements.

All of the work that A&S has produced for us has been of high quality workmanship, meeting or exceeding our demanding expectations. Being able to meet our critical project schedules is something that we have always been able to count on with A&S. We also have found A&S to make every effort to work with us to meet difficult project requirements in a pro-active and highly motivated manner.

We consider A&S to be one of our preferred and highly regarded suppliers.

We fully intend to continue our excellent relationship with A&S and to utilize them as a trusted supplier in support of our future equipment business activities.

Sincerely,

Michael Weill
Manager, Procurement
UOP/SM Honeywell
